Date of issuance: 14-3-2022 Date of Submission:16-3-2022
17-3-2022

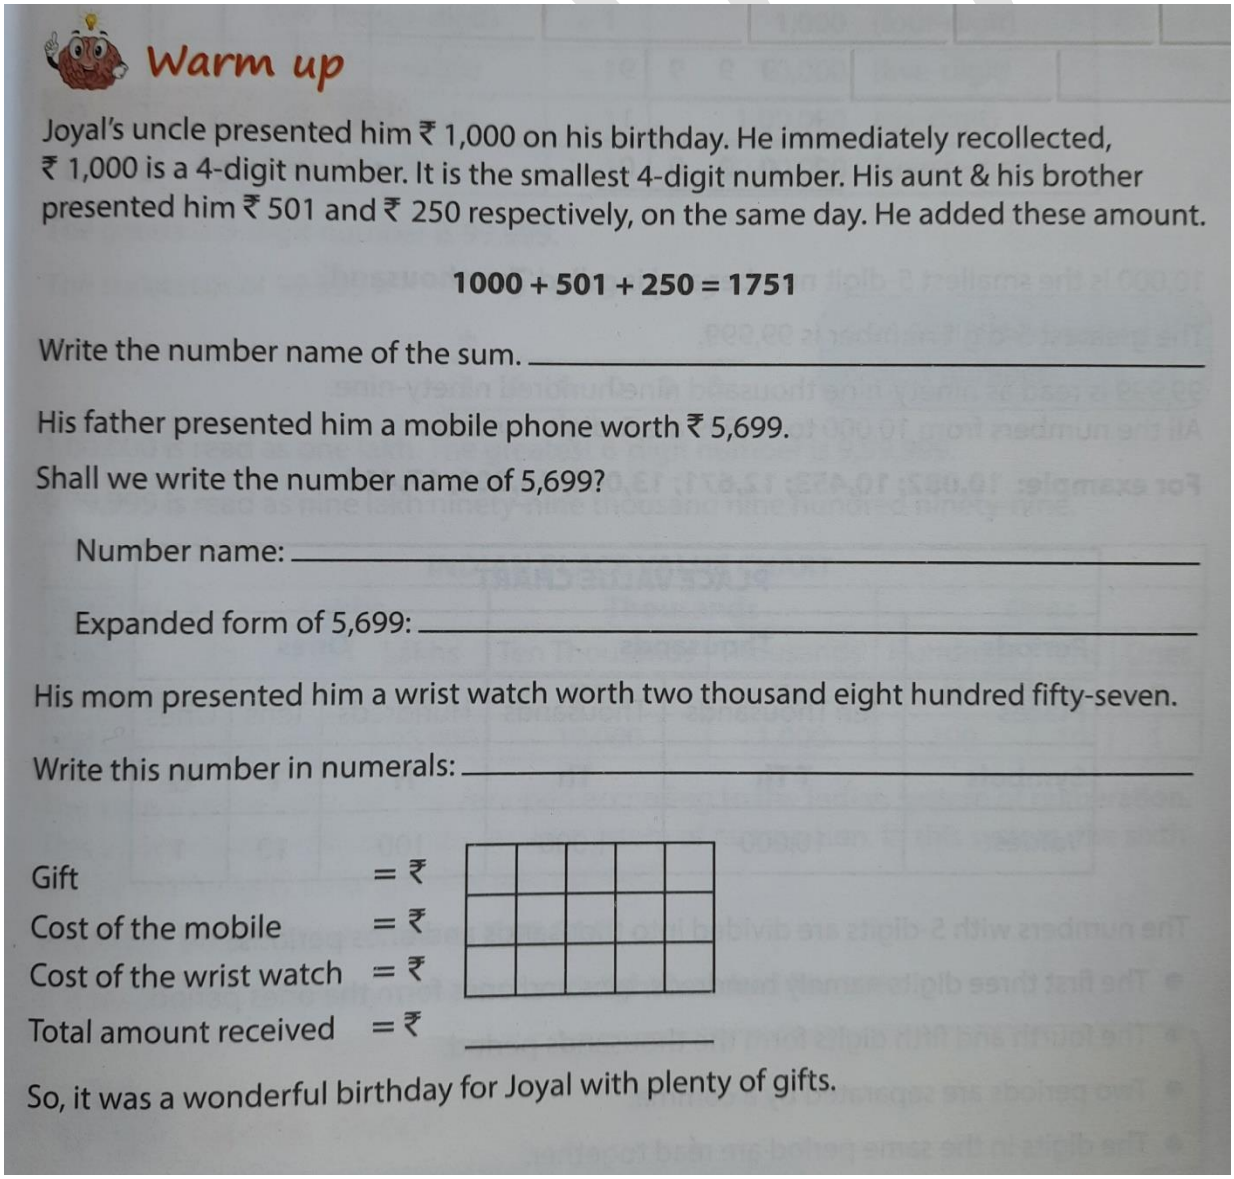
Aspect : Home Assignment – Day 8

- This pdf is not to be printed.

Objectives:

- Students will be able to write word form of 4- digit number and vice versa.

Note: Students are instructed to do this warm up activity in their text book only (page no. 5).
(Exercise 1.1 done in class)



Warm up

Joyal's uncle presented him ₹ 1,000 on his birthday. He immediately recollected, ₹ 1,000 is a 4-digit number. It is the smallest 4-digit number. His aunt & his brother presented him ₹ 501 and ₹ 250 respectively, on the same day. He added these amount.

1000 + 501 + 250 = 1751

Write the number name of the sum. _____

His father presented him a mobile phone worth ₹ 5,699.

Shall we write the number name of 5,699?

Number name: _____

Expanded form of 5,699: _____

His mom presented him a wrist watch worth two thousand eight hundred fifty-seven.

Write this number in numerals: _____

Gift = ₹

Cost of the mobile = ₹

Cost of the wrist watch = ₹

Total amount received = ₹ _____

So, it was a wonderful birthday for Joyal with plenty of gifts.
