### Chapter 21: Essay Writing

English Grammar Book page no. 120-122

**This pdf is not to be printed.**

Date of issuance: 31-8-2021 Completion Date: 2-9-2021

**Instructions:** Read the given below paragraphs about “Pollution”, sort them according to the structure of Essay Writing as introduction paragraph, body paragraphs and conclusion paragraph. Write them in a proper sequence to complete the Essay on “Pollution” in your English B notebook.

- Highlight introductory paragraph with pink colour, three body paragraphs with yellow colour and concluding paragraph with light blue colour.

Pollution is giving birth to dangerous diseases. So, it is high time that we should check **pollution**. We should take measures to protect our earth and save our lives.

It is shameful that the people do not care about the problems their vehicles are creating. People do not get their vehicles checked frequently to make them free from pollution producing carbon particles. These particles are thinning the ozone layer in the sky. This layer protects us from the ultraviolet rays of the sun.

Pollution is of many types, for example, **Air pollution, Water Pollution, and Noise Pollution**. With more vehicles on roads, more factories producing goods, and giving out smoke, more garbage from households and factories being dumped into the water bodies, pollution is damaging our environment.

Similarly, factories also throw out a lot of smoke and make the air polluted. The industrial wastes are often thrown into the nearby canals or rivers. These wastes are commonly poisonous and kill many water animals.

**Pollution** is increasing each day with increased production of waste. Pollution has become a burning topic in these days. It is making earth an unsafe place for human beings. It is a curse of the developing countries. These countries have set up industries to make progress. But these industries cause **pollution**. Forests are cut down for raw material. The polluted air cannot be purified without trees.
