Grade:KG.

Subject:EVS.

Topic:Parts of a plant.

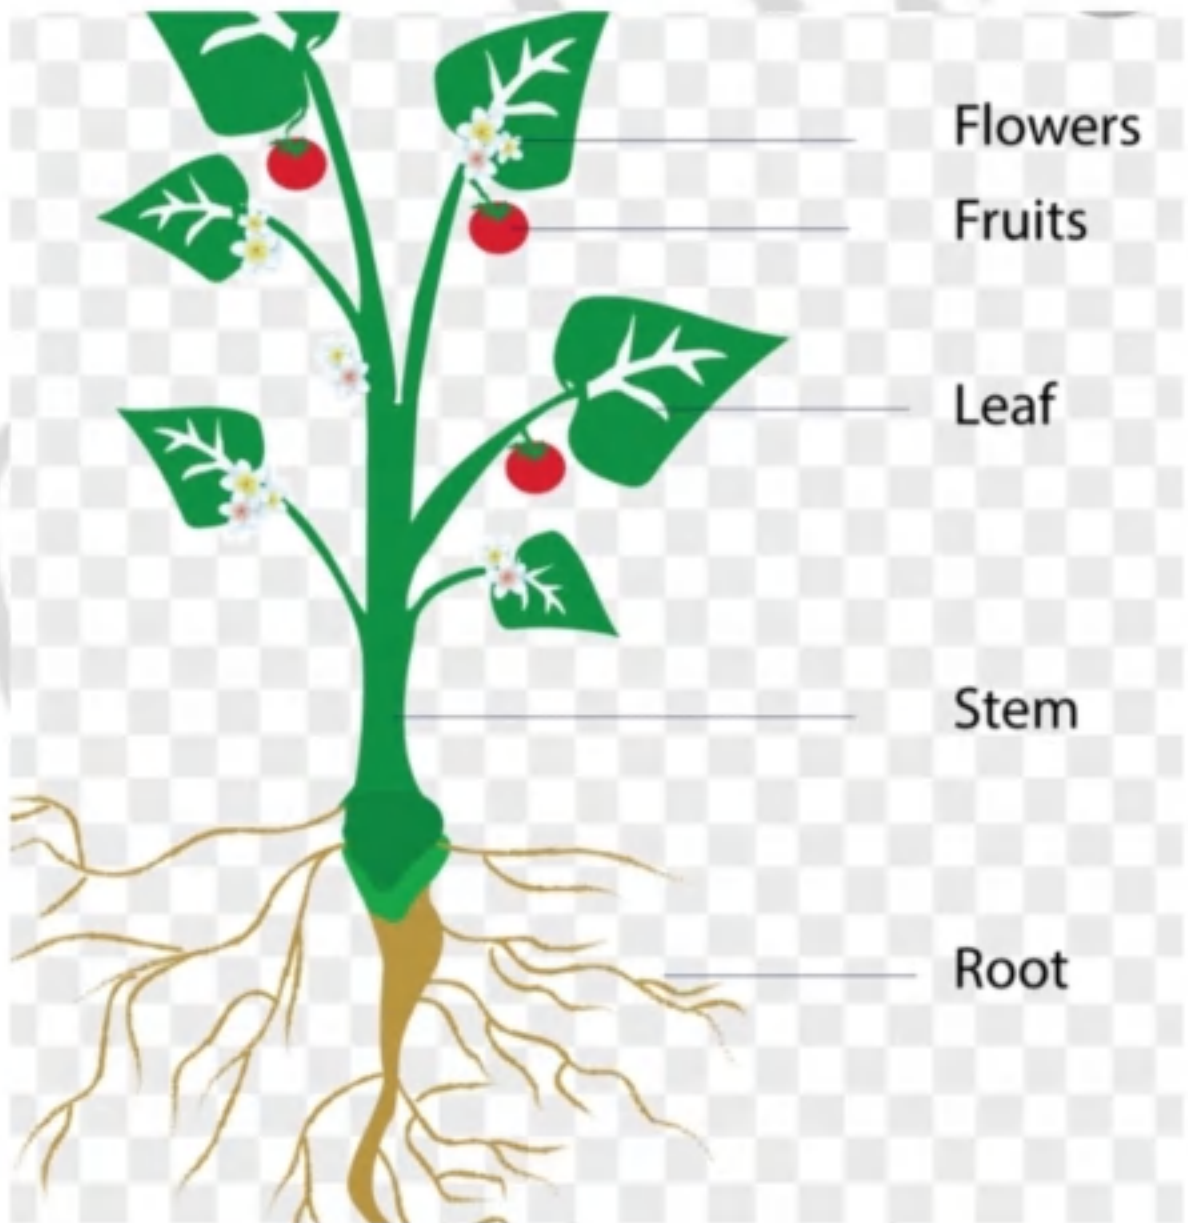

✓ A plant has many different parts that perform various functions. The two main parts of a plant are the root and shoot.

✓ The root grows under the ground while as shoot grows above the ground.

✓ The shoot has different parts called stem, leaf, fruit, flower.

✓ Stem is the stalk of the plant. It helps the plant to stand upright.

✓ Leaf is green in colour that helps plant to prepare food.

✓ A flower is the part of a plant that blossoms. Flowers produce the seeds that can become new plants.

✓ Fruits grow from the flowers of a plant and contain seeds .
