"Hand Hygiene is arguably our most important life skill. So teach it well and teach it often."

Greetings!

Hands are the main pathways of germ transmission during health care. Hand hygiene is therefore the most important measure to avoid the transmission of harmful germs and prevent healthcare-associated infections. Practicing hand hygiene is a **simple yet effective way to prevent** infections. Hand washing can become a lifelong healthy habit if we start teaching it at early age.

Grade-3 is organizing an event **"Global Hand Washing Day"** where students will talk about increasing awareness and understanding about the importance of hand washing with soap as an effective and affordable way to prevent diseases and save lives.

With great pleasure, we invite Grade-3 Goenkans to join us virtually on **October 16, 2021** from **12 pm to 1:30 pm** to celebrate saving lives together.

Thank you!

Regards,

Coordinator

Grade-3 Department
