The Science Fair

Science model competition.

Greetings!

The main objectives of organising science-related competitions are promoting interest in Science and Technology among younger generation and encouraging scientific and technological creativity among students and inculcating a sense of pride in their talent.

Grade 3 is organizing a competition "Science Fair" on October 23, 2021, from 12 PM to 1:30 PM virtually on zoom focusing on the importance of science in our day-to-day life.

The aims and objectives of this competition are to:

- create fun atmosphere for the participants
- be supportive of your science curriculum
- encourage the participants to want to try more science-related activities.

Competitions encourage students to adopt innovative techniques and develop their ideas and skills. Our students will be judged based on the following criteria:

- Presentation (oral)
- Content
- Creativity

There will be three winners from every section and rewards will be distributed according to the above criteria, that is, "the best science model."

With great pleasure, we invite all our students to join us virtually and let us celebrate science together.

Regards,

Coordinator

Grade 3 Department
