Grade: 2

Week,17/Day,1

Date:15/11/2021

Aspect: Revision Time

Lesson no.13

Topic: Weather and seasons

NOTE: This pdf is not to be printed.

LET'S BEGIN

WEATHER

The conditions in the atmosphere around us, is known as weather. Weather changes all the time. Weather can change many times during the day and from day to day. Weather may be sunny, humid, windy, rainy or cloudy. We feel different in different weather conditions. On a humid day we feel hot and we sweat a lot. On a windy day when the air becomes cold, weather turns cold. On a cloudy day weather becomes cool. Sunny days are hot. It is cool and pleasant in hill stations even in summers.

SEASONS

The change in weather gives rise to seasons. There are three seasons in India. They are summer, monsoon and winter. Seasons affect the clothes people wear, food they eat and the houses they live in. Summer lasts from April to June. Summer days are hot and warm. The days are long and nights are short. Rainy season or monsoon lasts from June to September. During the rainy season, the days are windy cloudy and cool. In rainy season we have rain, thunder and lightning. Winter season lasts from October to February. During winter, the days are short and the nights are long. In some places it is very cold and there is snowfall. In some places, enjoy autumn and spring.

DEAR GOENKANS LET US WRAP UP:

Fill in the blanks

1. In India there are _____ seasons.
2. _____ season comes after summer.
3. Children love to eat a lot of ice creams in _____.
4. We use fans in _____.
5. On a _____ day we sweat a lot.

BEST OF LUCK
