SANGEET

Music is sound that has been organized by using rhythm, melody or harmony. If someone bangs sauce pans while cooking, it makes noise. If a person bangs sauce pans or pots in a rhythmic way, they are making a simple type of music.

There are four things which music has most of the time:

- Music often has pitch. This means high and low notes. Tunes are made of notes that go up or down or stay on the same pitch.
- Music often has rhythm. Rhythm is the way the musical sounds and silences are put together in the sequence. Every tune has a rhythm that can be tapped. Music usually has a regular beat.
- Music often has dynamics. This means whether it is quite or loud or some where in between.
- Music often has timbre. This is a French word (pronounced the French way: "TAMBR") "The timbre" of a sound is the way that a sound is interesting. The sort of sound might be harsh, gentle, dry, warm, are something else. Timbre is what makes a Clarinet sound different from an Oboe, and what makes one person's voice sound different from another person.

It's A World Of Laughter

**It's a world of laughter a world of tears
It's a world of hopes and a world of tears
There's so much that we share
That's a time we're aware
It's a small world after all**

**It's a small world after all,
it's a small world after all
It's a small world after all,
It's a small world after all**

**There is just one moon and one golden sun
And a smile means friendship to everyone
Though the mountains divide and the oceans are wide
It's a small world after all**

Make Me A Channel

Make me a channel of your peace

Where there is hatred

let me bring your love

Where there is injury,

your pardon God

Where there is doubt true faith in you

Make me a channel of your peace

Oh, Master grant that

I may never seek

So much to be consoled

as to console

To be understood as to understand

To be loud as to love with all my soul

Make me a channel of your peace

Rasul Mir

Rasul Mir was born in Dooru Shahabad, an administrative unit in the Anantnag district of Kashmir. His year of birth and death, remains a debatable subject. According to oral traditions, the poet lived in Khanqah Faiz Panah, which was constructed by Hazrat Mir Mohammad Hamadani, the son of Hazrat Amir-i-Kabir (Mir Sayyid Ali Hamadani).

The house has since been demolished, and a vegetative garden can be found in its place there. It is widely believed that he had attended a local traditional makhtab (an academy), where he was introduced to the **Persian language**. He descended from a family of zamindars (landowners), who used to be the village heads in Mir Maidan at Dooru. It is said that the poet was a tall, handsome man with a fair complexion, who used to cover his head with a turban and sported a long moustache extending across his face.

The poet's well known contemporary Mahmud Gami was also a native of Doru Shahabad. The first attempts of scripting the Ghazal form in Kashmiri have been revered to him but they lack the artistic finish which is the hallmark of Mir's ghazals. In Mahmud Gami and Rasul Mir's legacy, two parks and a cultural library namely 'Mahmud Gami Rasul Mir Bazm-e-Adab' have been inaugurated as a token for these poets.

The Mughal Garden at Acchabal, the deep woods of Kokar Nag and Vernag Lake, are not far from the place where Rasul Mir lived. The poet, with his romantic bend of mind, must have been influenced by the abundance of natural beauty all around him.

He was often seen mentioning the name of these picturesque places in several of his poems. Rasul Mir's life spans over the reigns of three different sets of rulers in Kashmir - Afghan, Sikh and Dogra empire. He was born during the later years of Sikh rule over Kashmir.

One of his famous poems is:

Gaste wesiye lal chhum durey

Mea chhu mooray lalvun naar

Translation:

Go, my friend,

My love stays for away.

I have to nurture the fire of love every day.

The last couplet of this poem is:

Rasul Mir chhuy Shahabad

*Duray, Aem chhu trovmut ashq
dukaan!*

Yeevo ashkow cheyiv turi turay

Mae chu mooray lalvun naar

Translation:

Rasul Mir of Shahabad Dooray,
He has opened a love tavern

Come lovers, drink cupful's away.
I have to nurture the fire of love everyday

It is believed that he formed his way into the basic principles of poetry prevalent in his times and did not follow the conventional principles of poetry. In the skillful use of alliteration-*assonance* and the shuffling interplay of internal rhymes, Rasul Mir stands unrivalled in Kashmiri literature.

He played the most leading role in spreading Islam in Kashmir. Sheikh Noor aud Din Wali lived a simple saintly life. To purify himself spiritually, he spent twelve years in a cave. We learned honesty, purity, simplicity, kindness, sympathy, humbleness in his teachings. He taught us the way of truth and justice and service to humankind. His life is an example of peace and property towards resurrection. He influenced many spiritual teachers and saints, including Hamza Makhdoom, Resh Mir Sàeb, and Shamas Faqir. Noor-ud-Din spread his teachings and message through poems, commonly known as shruks. His poems have emphasized moral principles that often call for peace. He strived for Hindu–Muslim unity. One of his prominent poems is “**Ann poshi teli yeli wan poshi**”, which translates as “**Food will thrive only till the woods survive**”.

A Kashmiri poetess “Lal Ded” was his contemporary and had a great impact on his spiritual growth.

Noor-ud-Din is also credited with translating the Quran into the Kashmiri language. In 2015, the University of Kashmir published an Urdu book titled "Kalam-i-Sheikh-ul-Alam", comprising about 300 shruks of Nund Rishi translated into Urdu by Ghulam Muhammad Shad. Abdul Ahad Azad

Abdul Ahad Azad (1903-1948) was a well-known Kashmiri poet of the twentieth century. He was one of the pioneers of modernist movement and the first revolutionary socialist poet of Kashmiri literature. He belongs to the famous Dar tribe of Kashmir. He was one of the most explicitly political and nationalist poets of Kashmiri literature. But Azad's nationalist attitude is tempered by his socialism.

Azad wrote one of the most influential literary histories of Kashmir in Urdu language, *Kashmiri Zabaan aur Shaeri* (1984). He was also closely associated with the progressive strand of the Kashmir nationalist movement in 1940.

Many literary critics of Kashmiri literature like Avtar Krishan Rehbar (1997), Trilokinath Raina (2002) and Naaji Munawwar (1998) unanimously estimate the two poets (Mahjoor and Azad) as harbingers of a sort of renaissance in Kashmiri poetry.

According to Prem Nath Ganju (1987) and Chaman Laal Chaman (1979) two distinctive qualities which make Azad prominent as a perceptive intellectual and a powerful creative talent are:

- First, enjoying inspiration from **Mahjoor and Iqbal** both, he treated the action-urging thought of his poems as the most dominant features of his radically untraditional poetry, and allowed that feature to take the central position amidst all his later poetic outpourings;

Secondly, proceeding a few steps forward from **Mahjoor's pure and simple patriotism**, Azad expresses not only his egalitarian views and his ardent belief

As such he established himself as the very first Kashmiri poet representing overwhelmingly three tendencies, namely, action urges, egalitarianism and social equality, synthesizing all the three into a single dominant and distinctive note of his later poetic utterance.

Tanpura

The Tanpura or Tambura, tanpuri is a long-necked plucked string instrument, originating from India, found in various forms in Indian music. It does not play melody but rather supports and sustains the melody of another instrument or singer by providing a continuous harmonic bourdon or drone. A tanpura is not played in rhythm with the soloist or percusionist: as the precise timing of plucking a cycle of four strings in a continuous loop is a determinant factor in the resultant sound, it is played unchangingly during the complete performance. The repeated cycle of plucking all strings creates the sonic canvas on which the melody of the raga is drawn. The combined sound of all strings each string a fundamental tone with its own spectrum of over tones, supports and blends with the external tones sung or played by the soloist.

Harmonium

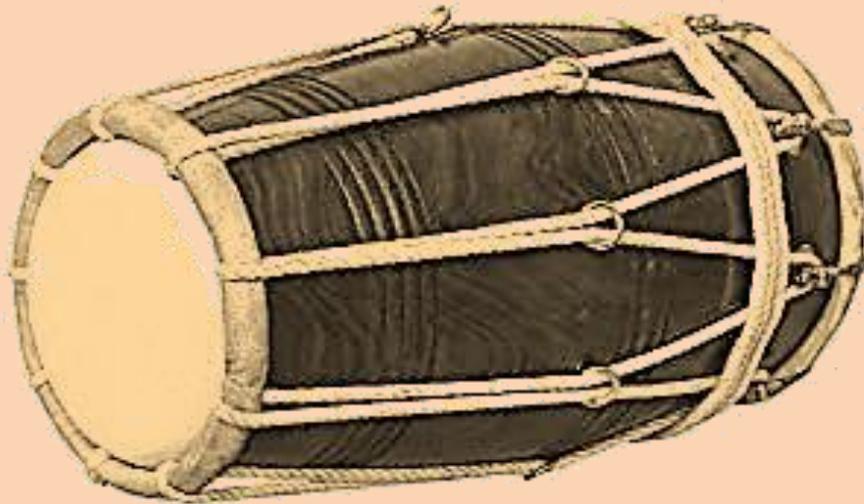

It was first invented by Alexandre Debain in 1840 in France, who patented his harmonium in Paris on August 09, 1840. The harmonium with a swarmandea (a small, harp-like instrument, similar to zither and auto harp) was produced by Bhisma Dev Vedi. As the swarmandal box was too big for the harmonium, his disciple Manohar Chimote fixed the strings within the breadth of the instrument, naming it as "samwadini". This instrument allows the strings to be played by the hand on the bellows, and keys by the other hand. Chimote provided a new natural 'Gandhar' tuning in this harmonium, although this tuning was limited to the 12 tones versus the 22 required in Hindustani classical music, it surely gave the European tuning of the harmonium, an Indian flavor. A harmonium, also called a "melodian", "read organ" or "pump organ", is a keyboard instrument that is a lot like an organ. It makes sound by blowing air through reeds which are tuned to different pitches to make musical tones.

Tabla

A table is a pair of twin hand drums from the Indian subcontinent. Since the 18th century, table has been the principal percussion instrument in Hindustani classical music where it may be played solo, as accompaniment with other instrument and vocals and as a part of larger ensembles.

Dholak

The dholak is a two-headed hand drum, a folk percussion instrument. The instrument is about 45 cm in length and 27 cm in breadth and is widely used in qawali, kirtan, lavani and bhangra. The drum has two different sized drumheads. The smaller drum head is made of goat skin for sharp notes while the bigger drum head is made of buffalo skin for low pitch.

Santoor

The Indian santoor instrument is a trapezoid-shape hammered dulcimer, and a variation of the Iranian santur. The instrument is generally made of walnut and has 25 bridges. Each bridge has 4 strings, making for a total of 100 strings. It is a traditional instrument in Jammu & Kashmir, and dates back to ancient times. It was called Shatha Tantri Veena in ancient Sanskrit texts.

Shehnai

The shehnai is a musical instrument, originating from the Indian subcontinent. It is made out of wood, with a double reed at one end and a metal or wooden flavoured bell at the other end. Its sound is thought to create and maintain a sense of auspiciousness and sanctity and as a result, is widely used during marriages, processions and in temples although it is also played in concerts. It was a part of the Naubat or traditional ensemble of nine instruments found in the royal court. The shehnai is similar to south india's Nadaswaram.

Piano

The piano is an acoustic, stringed musical instrument invented in Italy by Bartolomeo Cristofori around the year 1700 (the exact year is uncertain), in which the strings are struck by wooden hammers that are coated with a softer material (modern hammers are covered with dense wool felt; some early pianos used leather). It is played using a keyboard, which is a row of keys (small levers) that the performer presses down or strikes with the fingers and thumbs of both hands to cause the hammers to strike the strings.

The word "piano" is a shortened form of *pianoforte*, the Italian term for the early 1700s versions of the instrument, which in turn derives from *gravicembalo col piano e forte* (key cymbal with quieter and louder and *fortepiano*. The Italian musical terms *piano* and *forte* indicate "soft" and "loud" respectively in this context referring to the variations in volume (i.e., loudness) produced in response to a pianist's touch or pressure on the keys: the greater the velocity of a key press, the greater the force of the hammer hitting the strings, and the louder the sound of the note produced and the stronger the attack. The name was created as a contrast to harpsichord, a musical instrument that does not allow variation in volume; compared to the harpsichord, the first fortepianos in the 1700s had a quieter sound and smaller dynamic range.

Swarmandal

The swarmandal, surmandal or Indian harp is a plucked box zither, originating from the Indian subcontinent, similar to the qanun that is today most commonly used as an accompanying instrument for vocal Indian classical music. It is part of the culture of northern India, used in concerts to accompany vocal music. The name combines Sanskrit words *svara* (notes) and *mandala* (circle), the presenting its ability to produce many notes. The instrument may be the same as the 13th century 21-string instrument called the *mattakokila* (intoxicated cuckoo). The instrument was seen as an equivalent by *Ain-i-Akbari* in the Mughal period of qanun.

Synthesizer

Music synthesizer, also called **electronic sound synthesizer**. With the use of a digital computer it generates and modifies sounds. Synthesizers are used for the composition of electronic music and in live performance.

Synthesizers are capable of producing sounds far beyond the range and versatility of conventional musical instruments.

The first electronic sound synthesizer was developed by the American acoustical engineer Hary Olson and Herbert Belar in 1955 at the radio corporation of America (RCA) laboratories at Princeton, New Jersey.

Violin

The violin was first known in 16th century Italy. It is the smallest and highest-pitched of the instruments in the string family. Violins have been traditionally used as an accompaniment to singing and dancing. It is also an important classical solo instrument. Violin is sometimes known as a fiddle.
