Origami Day 2021: Let's give wings to their imagination!

Oh! What childhood does not include a paper plane?

Artistic Skills at Display

Humans are blessed with creative skill and imagination to transform the most monotonous image into vibrant and spirited composition.

To enhance the creative skills of our children, G D Goenka Public School, Srinagar has organized Grade wise Origami Activities for grades 1 to 6.

Origami-the Japanese art of folding paper into various shapes and figures, helps students to learn about basic geometric shapes such as squares rectangles and triangles. It not only improves their eye hand coordination, sequencing skills, maths reasoning, spatial skills, and memory but also patience and attention skills; and all this combined stimulates the brain specially when both hands are being used at the same time. So, to trigger the imagination of our budding artists, we need to look for ways to enhance their creative skills. With this objective in mind, we are organising these origami activities on November 11, 2021, through zoom virtual meet. Our budding stars are expected to create unique and exclusive craft work with folding and sculpting paper.

The theme for the origami is "Nature". Children can come up with wonderful ideas and can make craft like grass, landscape, oceans, forest, animals, birds etc by paper folding and put them creatively on a sheet to create the nature scenery. The little brains and hands can work in coordination smoothly and efficiently and create masterpieces to show their inner talent.

Participants will be judged on different parameters like neatness, paper folding, creativity, presentation in relevance to theme.

Use of glue, gum, stapler, or any binding material is not allowed and may account for disqualification.

Paper folding craft is not only a fun filled competition, but it also proves to be a valuable mean to develop artistic skills in young ones.

So, Let's meet on Zoom to have fun, on November 11, 2021- World Origami Day Timing: 1:00 pm to 1:40 pm
