

“Awareness is the greatest agent for change.”

Greetings!

Grade-6 is going to observe National Dog Bite Prevention Week, 2022, to raise awareness among students about appropriate and effective ways of preventing dog bites, dealing with such incidents, and first aid required in such cases.

Students will be delivering speeches on topics of concern such as statistics of dog bites in India, most common victims of dog bites, preventive measures and appropriate behaviour, first aid given to dog bite victims, rabies and its symptoms, causes, and treatment, and ways to spread awareness about the same.

In light of increasing incidents of dog bites, it is imperative that students are equipped with information that they can implement in practical scenarios. A Powerpoint presentation will be displayed across grades (1st to 10th) concerning the same.

It is hoped that the programme will be a catalyst for awareness and in turn bring about change to ensure safety of human and animal lives alike.

Date: 11-04-2022

Venue: Classrooms

Time: 10 A.M.

Regards

Coordinator
