“UNDERSTANDING CHALLENGES, EMPOWERING CHILDREN”

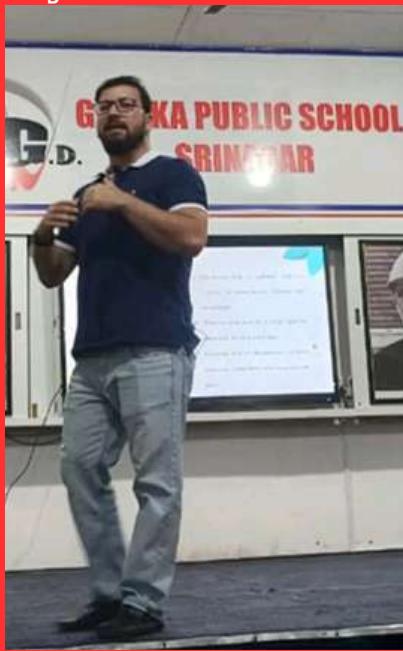

Every child can shine—if we understand, support, and believe in them.

Hence every child is unique and deserves the right support to thrive. With this objective, an enlightening session was organised on August 22, 2025, for teachers from Nursery to Grade 5, along with language teachers, counsellors, special educators, and librarians, on “Identifying Reading and Writing Difficulties in Children”. The resource person for the day was Dr. Muzzafar Ahmad, renowned Child and Adolescent Psychologist, Counsellor and Founder of Rainbow Foundation.

The program began with a warm welcome by our respected Principal Mr. Johnson P.J., who applauded Dr. Muzzafar for his dedication and initiative in helping teachers identify and address learning difficulties among children.

Dr. Muzzafar carried the audience into a deep exploration of the different types of reading and writing difficulties that children often struggle with but go unnoticed. He elaborated on dyslexia, where children find it hard to read, spell, or comprehend written text, dysgraphia, which leads to poor handwriting and difficulty in expressing mathematical thoughts on paper, dyscalculia, which makes understanding numbers and calculations a challenge, and dyspraxia, which involves motor coordination difficulties often reflected in clumsiness and poor handwriting. He also shed light on auditory and visual processing disorders, where children may hear or see normally, yet face challenges in interpreting sounds, letters, words, or symbols, leading to frustration in academic performance. He explained that how children struggling with these challenges are often misunderstood as being careless, lazy or inattentive, when in reality they require timely identification and individualized interventions.

کشمیری گوئنکنڈ

Kashmiri Goenkans Junior گوئنکنڈ کشمیری

The session also addressed the role of external factors such as parental pressure, early and excessive gadget use, social media influence, and lack of adequate school support in worsening learning challenges. Teachers were encouraged to view these difficulties with empathy and to recognize the need for collaborative efforts between parents and educators. To make the session more engaging, Dr. Muzzafar demonstrated practical intervention strategies and exercises designed to improve focus, attention, and motor coordination. Activities such as Hot Potato, Bear Walk, Banana Exercise, Lizard Walk, Donkey Kick and many exercises were introduced as simple yet effective tools that can be integrated into daily classroom routines to support children.

In his concluding address, Principal Mr. Johnson P.J. expressed heartfelt gratitude to Dr. Muzzafar for his impactful session. He reminded everyone present that children are the foundation of our future, and schools, parents and society must work together to ensure no child is left behind due to unrecognized difficulties. He underlined that the responsibility of nurturing every child's potential rests on collective shoulders and assured that Goenka Public School will continue to organize many such sessions for both teachers and parents to create a more compassionate, inclusive learning environment.

The event left teachers inspired and better equipped to identify and support students facing challenges in reading and writing. The interactive discussions, practical insights, and empathetic approach made the session not only informative but transformative.
